

**Due by March 31, 2012**

**Notice:** Pursuant to s. NR 216.07(8), Wis. Adm. Code, an owner or operator of a Municipal Separate Storm Sewer System (MS4) is required to submit an annual report to the Department of Natural Resources (DNR) by March 31 of each year to report on activities for the previous calendar year. This form is being provided by the DNR for the user's convenience. Personal information collected will be used for administrative purposes and may be provided to the extent required by Wisconsin's Open Records Law [ss. 19.31-19.39, Wis. Stats.].

This form is for reporting on activities undertaken in calendar year 2011.

**Instructions:** Complete each section of the form that follows. If additional space is needed to respond to a question, attach additional pages. Provide descriptions that explain the program actions taken to comply with the general permit. Complete and submit the annual report by March 31, 2012, to the appropriate address indicated on the last page of this form.

SECTION I. Municipal Information			
Name of Municipality City of Wausau		Facility ID No. (FIN) 31058	
Mailing Address 407 Grant Street	City Wausau	State WI	Postal Code 54403
County(s) in which Municipality is located Marathon	Type of Municipality: (check one) <input type="checkbox"/> County <input checked="" type="checkbox"/> City <input type="checkbox"/> Village <input type="checkbox"/> Town <input type="checkbox"/> Other (specify)		
SECTION II. Municipal Contact Information			
Name of Municipal Contact Person Sean J. Gehin, P.E.		Title Project Engineer	
Mailing Address 407 Grant Street	City Wausau	State WI	Postal Code 54403
E-mail Address sean.gehin@ci.wausau.wi.us	Telephone No. (include area code) (715) 261-6748	Fax No. (include area code) (715) 261-6759	
SECTION III. Certification			
<p><i>I hereby certify that I am an authorized representative of the municipality covered under MS4 General Permit No. WI-S050075-1 for which this annual report is being submitted and that the information contained in this document and all attachments were gathered and prepared under my direction or supervision. Based on my inquiry of the person or persons under my direction or supervision involved in the preparation of this document, to the best of my knowledge, the information is true, accurate, and complete. I further certify that the municipality's governing body or delegated representatives have reviewed or been apprised of the contents of this annual report. I understand that Wisconsin law provides severe penalties for submitting false information.</i></p>			
Authorized Representative Printed Name Jim Tipple		Authorized Representative Title Mayor	
Authorized Representative Signature 		Date Signed 3/26/12	
E-mail Address jim.tipple@ci.wausau.wi.us	Telephone No. (include area code) (715) 261-6803	Fax No. (include area code) (715) 261-6808	

**SECTION IV. General Information**

a. Describe what efforts the municipality has undertaken to invite the municipal governing body, interest groups, and the general public to review and comment on the annual report.

This annual report will be posted on the City of Wausau website for review. Also, printed copies can be requested at the Engineering Department at 407 Grant Street.

b. Describe how elected and municipal officials and appropriate staff have been kept apprised of the municipal storm water discharge permit and its requirements.

The Department of Public Works, which includes the Engineering, Planning and Public Works divisions, meets bi-monthly in staff meetings. Storm water management and permit requirements are routinely discussed in these meetings. Also, the City of Wausau is a member of the North Central Wisconsin Storm Water Coalition (NCSWC). This group meets monthly to discuss education and outreach activities and permit compliance related issues.

Engineering staff reports to the Capital Improvements and Street Maintenance Committee (CISM), which is a subcommittee of the City Council, on issues relating to storm water. This is done at monthly CISM meetings.

c. Has the municipality prepared its own municipal-wide storm water management plan?  Yes  No

If yes, title and date of storm water management plan:

The City of Wausau is in the process of preparing municipal-wide storm water pollution prevention plan (SWPPP). The goal of the report is to better document and organize the storm water measures the City has already undertaken and the steps or best management practices the City proposes to become compliant with the MS4 permit requirements. A draft copy of the report can be made available upon request.

d. Has the municipality entered into a written agreement with another municipality or a contract with another entity to perform one or more of the conditions of the general permit as provided under Section 2.10 of the general permit?  Yes  No

If yes, describe these cooperative efforts:

The Cities of Wausau, Marshfield, Merrill, Mosinee, Schofield, Stevens Point, and Wisconsin Rapids; the Villages of Kronenwetter, Rothschild and Weston; the Town of Rib Mountain; and Marathon County have joined together to form the North Central Wisconsin Stormwater Coalition.

The group's goal is to reduce stormwater pollution in North Central Wisconsin through an education and outreach program. This program includes the use of advertisements, public service announcements, seminars and websites to achieve the educational

**Annual Report under MS4  
General Permit No. WI-S050075-1**

Form 3400-195 (R 01/12)

Page 3 of 12

goals. The cooperative work will save taxpayer money and provide a unified message to the public.

Marathon County organized the group and heads the monthly meetings. In return for organizing the communities in the public outreach and education process, the City has agreed to sample the Marathon County MS4 discharges within the City of Wausau under our illicit discharge and detection program.

e. Does the municipality have an internet website?  Yes  No

If yes, provide web address:

[www.ci.wausau.wi.us](http://www.ci.wausau.wi.us)

If the municipality has an internet website, is there current information about or links provided to the MS4 general permit and/or the municipality's storm water management program?  Yes  No

If yes, provide web address:

<http://www.ci.wausau.wi.us/Departments/Engineering/StormWaterManagement.aspx>

**SECTION V. Permit Conditions**

a. Minimum Control Measures: For each of the permit conditions listed below, provide a description of the status of implementation of program elements, the status of meeting measurable goals, and compliance with permit schedule in section 3 of the MS4 general permit. Provide an evaluation of program compliance with the general permit, the appropriateness of identified best management practices, and progress towards achieving identified measurable goals. Be specific in describing the actions that have been taken during the reporting year to implement each permit condition and whether measurable goals have been met, including any data collected to document a measurable goal. Also, explain the reasons for any variations from the compliance schedule in the MS4 general permit.

- Public Education and Outreach

The City of Wausau works with the North Central Wisconsin Storm Water Coalition to coordinate the education and outreach program. A copy of the group's activities is attached.

The City in the fall of 2011 finished the construction and planting of a bioRetention facility located near the intersection of E. Bos Creek and Mortensen Dr. The device located in a residential neighborhood will hopefully encourage residents to infiltrate stormwater runoff from rooftop, driveways and sidewalk. A permanent sign will be placed at one of the device detailing how the shallow planted basin operates.

- Public Involvement and Participation

North Central Wisconsin Stormwater Coalition monthly meetings are open to the public, posted on Marathon County on-line bulletin board and sent to Wausau Daily Herald, City Pages, Marshfield News, and Midwest Radio Group. Meeting minutes are posted on the Marathon County website and sent to all NCWSC members.

- Illicit Discharge Detection and Elimination

In accordance with Section 2.3 of the General Permit the City has adopted Chapter 15.60 of the Wausau Municipal code, Illicit Discharge Detection and Elimination Requirements.

An initial field screening of all major outfalls within the City limits for illicit discharges was conducted in the fall of 2009. The field screening did not discover any significant non-storm water discharges. The rescreening of the City's major outfalls will be completed in the fall of 2012. The continued sampling frequency of major outfalls will be dependent on future results. A copy of the 2009 stormwater outfall screening can be made available per request.

- Construction Site Pollutant Control

Chapter 15.56 of the Wausau Municipal Code has been adopted to meet the requirements for creating an ordinance to regulate erosion and sediment at construction sites. The City of Wausau does have authority from the Department of Commerce to

regulate erosion control at public buildings and places of employment. The City of Wausau has building inspectors, engineering technicians and engineers who monitor erosion control on sites. City is currently working with the Inspection Department to streamline the review and inspection of construction erosion control.

The City of Wausau will be working with the DNR to incorporate current revisions to NR 151 and NR 216 rules into the existing storm water ordinance.

- Post-Construction Storm Water Management

In accordance with Section 2.5 of the General Permit, the City has adopted Chapter 15.56 of the Wausau Municipal Code, Storm Water Management.

The City of Wausau will be working with the DNR to incorporate the current revisions to NR 151 and NR 216 rules into the existing municipal storm water ordinance.

- Pollution Prevention

The City owns and operates a vast network of storm sewer and structural best management practices (BMP) that convey, detain, and treat the City's stormwater runoff. The structural best management devices consist primarily of catch basins, swales, and detention ponds (dry and wet). In addition, treatment of small basins on a limited basis is accomplished using hydrodynamic separation devices. These devices combined with street and catch basin cleaning currently removes 23.5 percent of its TSS Load.

The inspection and maintenance of the City-owned stormwater facilities varies depending on the type of structure. In the spring of 2011 the City inspected all of its wet and dry stormwater basins. The inspection included the review of sediment accumulation, side slopes, inlet structure, outfall structure, erosion, emergency spillway, and vegetation. In general due to the age of the structures there was not any immediate correction action required. The City's SWPPP when complete will include an inspection and maintenance schedule for its BMP's.

The City's street sweeping program, using regenerative air and mechanical sweepers, begins in April and continues through November. The City performs an aggressive program in the spring, sweeping most all of the streets on a weekly basis. After this initial effort the residential streets on average are cleaned 6 to 7 times throughout the season. However, the City's main arterials and collectors are continually cleaned on a weekly basis. A total of 2,935 cubic yards of material was removed from the roadway during the program in 2011. The removed material is used as fill at the municipal airport through the Conditional Low

**Annual Report under MS4  
General Permit No. WI-S050075-1**

Form 3400-195 (R 01/12)

Page 6 of 12

Hazard Grant of Exemption for the Beneficial use of Street Sweeping and Stormwater Solids for use as Roadbed, Fill Material and Aggregate in Asphalt Paving Mix.

The City of Wausau has hundreds of catch basins serving the local roadways throughout the Wausau area. The installation of catch basins with a 2-foot sump has replaced the use of inlets on all new storm sewer and improvement projects. In the spring and fall of 2011 the City cleaned the catch basin sumps, 547 cubic yards of mostly sand and gravel was removed. The City's catch basins will be routinely inspected and maintained on a biyearly basis, typically in the spring and fall of each year.

A yard waste site is open to the City's residents beginning in April through the middle of November. Residents are allowed to drop off general yard waste (i.e. grass clippings, leaves, and brush). The collected material is disposed at a licensed compost site. In 2011 the City hauled 6,851 cubic yards of grass clippings and leaves to DNR licensed site for composting.

The City of Wausau has taken steps to reduce stormwater pollution at its public works garage and storage areas. The floor drains located within the garage have been redirected into the sanitary sewer. Catch basins with sumps have replaced inlets at the public works garage parking lot and storage area. Inlet protection has been placed within or around catch basins adjacent to uncovered stockpiles. The loading area adjacent to the salt shed was paved to allow the sweeping of spilled salt back into the facility. A dewatering basin and grass swale were constructed downstream of snow and street sweeping stockpiles located behind Pine Grove Cemetery.

The City of Wausau follows the DOT " Highway Maintenance Manual" for the application of road salt and deicers.

b. Storm Water Quality Management: Has the municipality completed a pollutant-loading analysis to assess compliance with the 20% TSS reduction developed urban area performance standard?  Yes  No

If yes, provide the following: Model used WinSlamm Version 9.3 Reduction (%) 23.5

If no, include a description of any actions the municipality has undertaken during 2011 to help achieve the 20% standard.

Has the municipality completed an evaluation of all municipal owned or operated structural flood control facilities to determine the feasibility of retrofitting to increase TSS removal?  Yes  No If yes, describe:

The City in 2010 contracted with AECOM to model our 40% TSS compliance mandated at the time by the WPDES permit. The analysis completed in December of 2010 recommended practices to reach the mandated 40%. In 2011 Wisconsin legislation passed Act 32 lowering TSS performance standard to 20%. The City's current stormwater plan is to maintain it's current facilities to continue to meet over 20% TSS reduction.

c. Best Management Practices Maintenance: Does the municipality have a maintenance program for installed storm water best management practices?  Yes  No

If yes, describe the maintenance program. If available, attach any additional information on the maintenance program.

**Annual Report under MS4  
General Permit No. WI-S050075-1**

Form 3400-195 (R 01/12)

Page 7 of 12

The City on a biannual basis (spring and fall) inspects and maintains its stormwater BMP's. See pollution prevention above for more detail.

d. Storm Sewer System Map: Describe any changes or updates to the storm sewer system map made in the reporting year. Provide an updated map if any changes occurred during the reporting year.

No major changes, updates are available from the City of Wausau GIS department.

**SECTION VI. Fiscal Analysis**

- a. Provide a fiscal analysis that includes the annual expenditures for 2011, and the budget for 2011 and 2012. A table to document fiscal information is provided on page 6.
- b. What financing/fiscal strategy has the municipality implemented to finance the requirements of the general permit?  
 Storm water utility  General fund  Other \_\_\_\_\_
- c. Are adequate revenues being generated to implement your storm water management program to meet the permit requirements?  Yes  No

Please provide a brief summary of your financing/fiscal strategy and any additional information that will assist the Department in understanding how storm water management funds are being generated to implement and administer your storm water management program.

The City of Wausau has set aside approximately \$355,000 over the past few years for stormwater improvements. In 2011 funds were used to alleviate flooding in the Fountain Hills Subdivision. This year stormwater funds will be used to repair deteriorated storm sewer, maintain existing structural bmp's, and to correct minor drainages issues throughout the City limits.

**SECTION VII. Inspections and Enforcement Actions**

**Note: If an ordinance listed below has previously been submitted and has not been amended since that time, a copy does not need to be submitted again. If the ordinance was previously submitted, indicate such in the space provided.**

- a. As of the date of this annual report, has the municipality adopted a construction site pollutant control ordinance in accordance with subsection 2.4.1 of the general permit?  Yes  No If yes, attach copy or provide web link to ordinance:  
<http://www.ci.wausau.wi.us/Departments/Engineering/StormWaterManagement.aspx>

- b. As of the date of this annual report, has the municipality adopted a post-construction storm water management ordinance in accordance with subsection 2.5.1 of the general permit?  Yes  No If yes, attach copy or provide web link to ordinance:  
<http://www.ci.wausau.wi.us/Departments/Engineering/StormWaterManagement.aspx>

- c. As of the date of this annual report, has the municipality adopted an illicit discharge detection and elimination ordinance in accordance with subsection 2.3.1 of the general permit?  Yes  No If yes, attach copy or provide web link to ordinance:  
<http://www.ci.wausau.wi.us/Departments/Engineering/StormWaterManagement.aspx>

- d. As of the date of this annual report, has the municipality adopted any other ordinances it has deemed necessary to implement a program under the general permit (e.g., pet waste ordinance, leaf management/yard waste ordinance, parking restrictions for street cleaning, etc.)?  Yes  No If yes, attach copy or provide web link to ordinance:

- e. Provide a summary of available information on the number and nature of inspections and enforcement actions conducted during the reporting period to ensure compliance with the ordinances described in a. to d. above.

The City of Wausau Inspections Department issued a total of 17 new construction residential, 4 multi-family and 6 new construction commercial building permits in 2011. Each of these structures was inspected by the City's building inspectors during construction to ensure compliance with local, state and federal building codes as they relate to erosion control. The City of Wausau also inspected the reconstruction of 8 residential streets in 2011. The City was responsible for inspecting erosion

**Annual Report under MS4  
General Permit No. WI-S050075-1**

Form 3400-195 (R 01/12)

Page 9 of 12

control measures on these reconstructions and ensuring compliance with the erosion control plan.

**SECTION VIII. Water Quality Concerns**

a. Does any part of the MS4 discharge to an outstanding resource water (ORW) or exceptional resource water (ERW) listed under s. NR 102.10 or 102.11, Wis. Adm. Code? (A list of ORWs and ERWs may be found on the Department's Internet site at: <http://dnr.wi.gov/org/water/wm/wqs/orwerw/>)  Yes  No If yes, list:

b. Does any part of the MS4 discharge to an impaired waterbody listed in accordance with section 303(d)(1) of the federal Clean Water Act, 33 USC § 1313(d)(1)(C)? (A list of the most current Wisconsin impaired waterbodies may be found on the Department's Internet site at: <http://dnr.wi.gov/org/water/wm/wqs/303d/303d.html>)  Yes  No If yes, complete the following:

- Impaired waterbody to which the MS4 discharges:

Wisconsin River

- Description of actions municipality has taken to comply with section 1.5.2 of the MS4 general permit for discharges of pollutant(s) of concern to an impaired waterbody:

Pollutants of concern for the Wisconsin River are listed as Mercury and PCB's in the sediment. The City of Wausau has an aggressive street sweeping program using both mechanical sweepers and regenerative air sweepers. Through street sweeping and catch basin cleaning, the city collected 3,482 cubic yards of sediment off the streets. Collecting these larger particles keeps additional heavy metals, such as mercury, from entering the water way.

c. Identify any known water quality improvements in the receiving water to which the MS4 discharges during the reporting period.

None.

d. Identify any known water quality degradation in the receiving water to which the MS4 discharges during the reporting period and what actions are being taken to improve the water quality in the receiving water.

Weed & algae infested bays in Lake Wausau has degrade the water quality. The Lake Wausau Association along with help from the DNR and neighboring communities will be completing a study to determine the cause of the algae infestation and the best management practices that can be applied to improve the current water condition.

**SECTION IX. Proposed Program Changes**

a. Describe any proposed changes to the storm water management program being contemplated by the municipality for 2012 and the schedule for implementing those changes. Proposed program changes must be consistent with the requirements of the general permit.

The City of Wausau will be working with the North Central Stormwater Coalition and DNR to update the current stormwater ordinances govern by the local communities. The City of Wausau is not currently proposing to add any new bmp's in 2012 due to Act 32. City's plan is to maintain the existing bmp's to continue to achieve 23.5% TSS reduction.

Fiscal Analysis Table. Complete the fiscal analysis table provided below.

Program Element	Annual Expenditure		Budget		Source of Funds
	2011	2011	2011	2012	
Public Education and Outreach					The City of Wausau uses General funds to pay for all aspects of storm water management. Detailed budget analysis is not kept on each individual area. Existing staff and resources are utilized to implement the program.
Public Involvement and Participation
