

## How To Use VPN

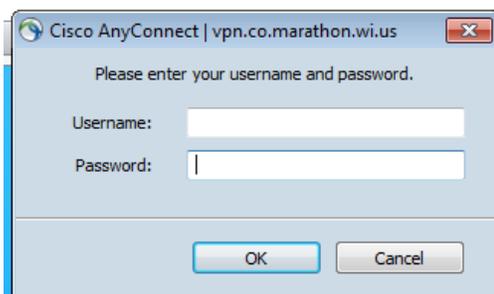

1. First, please make sure you have an internet connection before you try connecting VPN.
2. Double click on the Cisco AnyConnect icon on your desktop or on your taskbar.

3. The below window should appear. Please make sure the address **vpn.co.marathon.wi.us** is in the white space before you click Connect. If it isn't listed you can type it in.

4. After you click Connect, the below window will appear. Enter your computer username and password and click OK.

5. When you are successfully connected you will see a gold lock on the AnyConnect icon on the taskbar near the time.
